

The CAGED System

The name stems from the five basic chord **shapes** that all beginner **guitar** players learn: C major, A major, G major, E major, and D major. Critics of the **CAGED system** feel that it overly simplifies the **guitar**. Music **theory** can be quite complicated, but **theory** is **theory** and music is music.

Next start with an open A Major chord and use the CAGED System to move up the fretboard. The order will be A G E D C
